

21世紀COEセミナー

日時：平成19年11月26日（月）13：30～14：30

場所：理学部H棟3F コミュニケーションスペース

Superconductivity in non-centrosymmetric materials

講師：Prof. Daniel Agterberg

(Department of Physics, University of Wisconsin – Milwaukee, USA)

Recent theoretical results on non-centrosymmetric superconductors will be presented. An emphasis will be placed on new superconducting phases that appear when magnetic fields are applied. The relationship between these new phases and FFLO phases will be highlighted. Finally, the role of fractional flux vortices will be discussed.
